PROFILE

Dedicated individual seeking an opportunity to contribute effectively to organizational success while developing professional knowledge and taking on new responsibilities. Committed to continuous growth, achieving career goals, and supporting organizational objectives through dedication, adaptability, and a positive approach in a professional work environment.

PROJECT

Voting Verification Machine (VVM)

Online Voting System Using Blockchain

Developed a secure online voting platform with voter registration, secure authentication, vote verification, and transparent vote recording. Built using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, with MetaMask and Ganache for blockchain-based authentication, ensuring secure and reliable digital elections.

ACHIEVEMENTS

Received Second Prize in a school-level drawing competition, demonstrating creativity, artistic skills, and dedication to participating in extracurricular activities.
